Decline of 10 Points on Sale Fluctuations Are Restricted of 4,000 Shares as Directors Announce Omission Preferred Payment

Directors of the Cuba Cane Sugar case at this time on the \$50,000,000 preferred stock outstanding. Almost immediately following the announcement of the board's action in Wall Street the price of the preferred shares broke 10 points from 50 to 40 on a single transaction of 4,000 shares. At the closing quotation of 42% there was a net loss for the day of 10½ points. The bottom price was the lowest since the company was organized in 1915 by a group of powerful banking and financial interests to acquire a number of Cuban sugar plantations and factories.

The specialist in the stock on the floor of the Stock Exchange explained that the violent break in the price was due to the fact that there were no bids in the market after the stock had touched 50 on earlier selling. However, he had orders to sell "at the market" 4,000 shares, which were finally taken by tradess and they have set.

touched 50 on earlier selling. However, he had orders to sell "at the market" 4,000 shares, which were finally taken by traders and other buyers at 40. The specialist stated that had he executed such a large order immediately, or without shopping around the floor of the exchange for bids, the decline would probably have been worse. He pointed to the failure of the stock to rally much above 42 as evidence that 40 was not an unfair price at which to sell a block as large as 4,000 shares. A formal statement issued after yesterday's meeting attributed the passing of the preferred dividend to the present condition of the sugar market. A member of the exchange, speaking informally of the board's action, said that the decline in the price of sugar during the past few days had influenced the decison. This was considered significant in view of the impression in several brokerage offices. Thursday and yesterday morning that the dividend would be paid. As a mat-ter of fact, in these quarters it was said that this information came from

fered a severe decline yesterday was that of the Pierce Oil Company. From Thursday's last sale price of 69 there was a decline to 54, from which there was a recovery at the close to 59, a net loss of 10 points. Specialists in the stock declared that the conditions surrounding this stock were similar to

the stock declared that the conditions surrounding this stock were similar to those affecting Cuba Cane preferred. When stock was offered for sale practically no buying orders were in evidence, with the result that bids had to be sought by the specialist.

Eben Richards, vice-president, denied there were any developments in the affairs of the company to account for the extreme weakness in the preferred stock. He said that the directors would declare the usual dividend due to be paid on July 1 and that negotiations for new financing were progressing satisfactorily. It is understod that this will take the form of a \$6,000,000 note issue and that Goldman, Sachs & Co. will act as the bankers. will act as the bankers.

Trend Uncertain Textile Trades Improved, Says Boston Reserve Bank

Ready to Take Stand; Retail Business Shows Some Normalcy in Trade Falling Off Compared to **Previous Months and Last** Year; Caution Prevails

Bank.

Lttle change was shown in employment conditions in May, compared with April, says the report, although unemployment is believed to be less than it was during the middle of the winter.

The New England textile mills, producing setton and woolen goods chiefly. The New England textile mills, producing cotton and woolen goods chiefly, operated at approximately two-thirds to three-quarters of capacity during the mouth of May, according to the bank, while the production of boot and shoe factories as well as the leather tanneries was less than that of textiles. The metal industries remained quiet, and the bank attributes this to the fact that the automobile factories, which use many of the metal products, are operating at only about 50 percent

Commercial Credit

wholesale credit men. The slowing up of retail trade during April and early May because of the unseasonable weather is given as the principal reason. With reports indicating a bet-terment in retail trade, the wholetailers are in precarious financial cir-cumstances, and it is hinted that the crop of failures during July and Au-

gust may take an upward swing for this reason. The commercial money situation was effect was more than counterbalanced later for the majority of new notes, with as a result of arrangements to start trading in the September delivery here without further delay.

Corn and oats were depressed by a remewal of large receipts of corn. The arrivals of corn were estimated to total 700 quoted the following discount rates on sears.
